RIMLESS

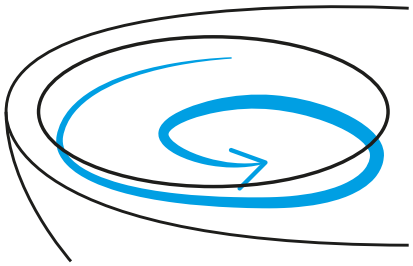

I vasi Rimless sono una soluzione moderna in termini di igiene e facilità di pulizia. Rimless elimina definitivamente la brida sostituendola con un canalizzatore di flusso che assicura un risciacquo completo e dinamico, aumenta l'igiene del vaso e diminuisce il consumo d'acqua

EN Rimless toilets are a modern solution in terms of hygiene and ease of cleaning Rimless technology completely eliminates the rim, replacing it with a specially designed flow distributor that ensures a powerful and thorough flush. This improves hygiene while also reducing water consumption.

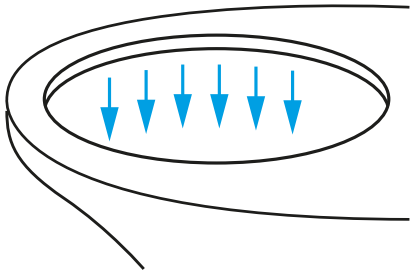

TORNADO

La tecnologia Tornado utilizza uno scarico a vortice che distribuisce l'acqua in modo circolare all'interno del vaso, garantendo una pulizia più uniforme ed efficace con minore consumo d'acqua e maggiore igiene. Il flusso avvolgente migliora anche la rimozione dei residui nelle zone meno accessibili.

EN The Tornado system uses a vortex flush that circulates water around the, ensuring more even and effective cleaning with reduced water consumption and improved hygiene. The swirling flow also enhances waste removal in hard-to-reach areas.

SEDILI WC

WC SEATS

TERMOINDURENTE ANTIBATTERICI

SEDILI WC ANTIBATTERICO FISAGGIO RAPIDO

Questo sedile WC è dotato di un trattamento antibatterico che previene l'accumulo di germi e batteri, rendendolo più igienico rispetto ai prodotti non trattati. Le cerniere a sgancio rapido permettono di rimuovere il sedile in modo semplice e veloce per una pulizia approfondita, mentre le cerniere soft close impediscono lo sbattimento, rendendo il sedile più silenzioso e sicuro, soprattutto per i bambini. Realizzato in resistente materiale termoindurente, viene fornito completo di tutti gli accessori necessari.

ANTIBACTERIAL TOILET SEAT WITH QUICK-RELEASE FIXING

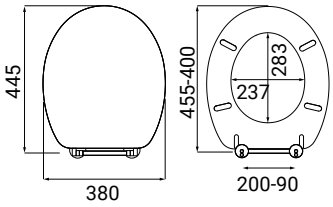

This toilet seat features an antibacterial treatment that prevents the buildup of germs and bacteria, making it more hygienic than untreated products. The quick-release hinges allow the seat to be removed easily for thorough cleaning, while the soft-close hinges prevent slamming, making it quieter and safer, especially for children. Made from durable thermosetting material, it comes complete with all necessary accessories.

In fase di installazione, i supporti pieghevoli tengono le cerniere lontane dal wc mentre si allinea il sedile. La superficie adesiva antiscivolo posta sotto le cerniere fa in modo che il sedile non scivoli mai.

During installation, the foldable supports keep the hinges away from the toilet while the seat is being aligned. The non-slip adhesive surface located beneath the hinges ensures that the seat never slips
